

# Twice the efficiency.

## Without hydraulic headaches.

Dedicated sweeping and scrubbing functions with one-pass cleaning power keep dry debris dry without introducing scrub solution into the debris hopper.

The new green class of industrial cleaning technology has arrived. The Advance CS7000 Series Combination Sweeper-Scrubber reinvents an entire class of equipment by reducing total cost of ownership, while effectively doubling fuel economy and runtime. Available in three models, LPG-Hybrid, Diesel-Hybrid and ePower™ Battery, the CS7000 Series delivers unparalleled performance, replacing 98% of high-maintenance, leak-prone hydraulic components with an intelligent system of electronically-controlled, low-maintenance electric drives. This technology shift alone will save the average owner thousands of dollars in reduced maintenance costs. Now, the most ecological solution is also the most economical. ### Guillotine Knife Assemblies

handle flexible materials; 400 cuts/min

Sur-Cut guillotine knife assemblies cut a wide variety of flexible materials, including films, foils, paper products, nonwovens, laminates, textile products, etc., at rates up to 400 cuts/min. Various blade openings and clearances can be modified to meet specific requirements. The assemblies can be mounted in any position.

### Low-Foaming Cutting Fluid

boosts surface finish & overall cleanliness

Latest addition to line of ValCool cutting fluids, the VPLFC, is a heavy-duty, non-chlorinated, semi-synthetic coolant with advanced foam control properties, which are needed

for today's high-pressure systems (1,000 psi and up). It offers long tool life, superior surface finishes, and reduced consumption. VPLFC comes in 5-gal pail to 55-gal drums.

### Direct-Drive Panel Fans

16 to 60 in. diam; up to 60,000 cfm

APW panel fans provide aerodynamically-efficient performance within a heavy-duty welded steel panel and motor base. They come in 14 to 60-in. diameters with capacities ranging up to 60,000 cfm. The fans

have a factory-set, adjustable-pitch impeller and baked polyester powder coat paint finish.

# Kroil Loosens Frozen Metal Parts

Guaranteed to meet your expectations - whatever they may be

#### Solid Science

Based on scientific discoveries at Kano Laboratories, Kroil creeps into millionth inch spaces, dissolves rust and lubricates to loosen frozen metal parts.

#### Nothing Works Like Kroil

Kroil's unique, proprietary molecular architecture creates an affinity to metal, which guarantees swift penetration, while maintaining a molecular structure that breaks bonds due to corrosion, contaminants or compression.

Sold Direct to Industry - No Minimum Order. Call 866-487-7343 or learn more at [www.kanolabs.com](http://www.kanolabs.com)

#### Trial Offer

2 King Size Cans for \$12 + \$5.95 Shipping

Delivered to your door
