

# A taste of technologies

## WETTING ATTENDEE APPETITES FOR PACK EXPO INTERNATIONAL 2014.

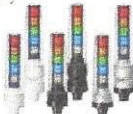

The following are just a small sample of what attendees noticed on the show floor.

Nutec used PACK EXPO Las Vegas to introduce Lixis Vision Inspection Systems to North America. Previously Lixis Vision systems were only available in Europe and South America. The Lixis PVS system inspects print quality and performs character verification.

National Bulk Equipment, Inc.'s bulk bag un-loader system, handling highly caustic, severely agglomerated material, operates as a closed process; ensuring the protection of operators from migrant, airborne material and eliminating the possibility for contamination of material in-process. The highly compressible material requires integrated bulk bag conditioning to provide sufficient material supply.

Patlite introduced LS7-9 Series Signal Light Towers which feature an elegant, smooth surface design that is IP69K rated to withstand high-pressure and high-temperature washdown operations.

QuickLabel Systems released the Kiaro! 200, a new wide color label printer capable of printing 1200 dpi high resolution labels that measure up to 8 in. wide by more than 17 in. long, at speeds of 8 in. per second.

Sepha Ltd. launched BottleScan, the world's first toolless, non-destructive, multi-bottle integrity tester for induction-sealed pharmaceutical bottles. It uses force decay technology to detect weak seals and defects down to 15 microns.

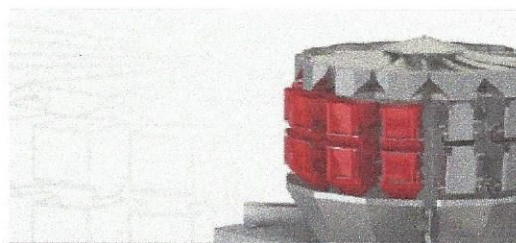

Material Transfer & Storage, Inc.'s Material Master™ bulk bag discharging system provides sealed discharge of dry bulk materials. A Sure-Seal™ actuated spout clamping system seals the bag discharge spout for dust-tight operation. The unit includes a Flo-Master™ bag massaging system, which promotes positive material flow and a powered Flo-Lock™ discharge spout closure system quickly halts material flow for partial bag discharging.

AZCO Corp. unveiled their brand new 5D desiccant dispenser. This unit is compact in size, easy to use and affordable, offering you freedom of choice to run all desiccants. **PMT**
