### Skin pack for tray sealers

Designed for meat, poultry, and fish packaging.

Packaging Automation's vacuum skin pack option for its complete range of tray sealers creates high-

visibility vacuum packs on preformed shallow trays to improve convenience,

protection, and freshness, as well as provide 95% waste, reduced pack weight, and increased productivity at a sealing rate of 75 packages/min.

## Equipment

### Adjustable starwheel

Designed for food applications where products must be maintained for processing and sorting purposes, Multi-Conveyor's single-lane case flipper—or starwheel—rotates filled cases 180 deg in the direction of travel after entering the output-shaped device and gently places it back on the line without turning the case or product inside.
