

Guillotine Knife Assembly delivers clean, precise cuts.

October 29, 2012 - Installed as stand-alone or in-line units, guillotine knife assemblies can be mounted in any position and are designed for extended blade life, clean cuts, and minimal maintenance. Cutting rate is up to 400 cuts/min, governed by air pressure, flow rate, and cut length, and blade openings and clearances can be modified to meet specific requirements. Able to cut various flexible materials, assemblies come in heavy-duty and custom units.

SUR-CUT GUILLOTINE KNIFE ASSEMBLY

Ready to install as stand-alone or in-line units

Fairfield, NJ – AZCO Corp.'s guillotine knife assemblies offer many benefits, including simple installation and hook-up, long blade life, clean cuts, and low maintenance. These units can be mounted in any position for convenient operation. They cut a wide variety of flexible materials including films, foils, paper products, nonwovens, laminates, textile products, and many others.

Cutting rate is up to 400 cuts per minute. Rate is governed by air pressure, flow rate, and cut length. Heavy duty and custom units are also available. Various blade openings and clearances can be modified to meet specific requirements. Options include blade position sensors, custom blade geometry, variety of blade material and coatings, and a SMARTKNIFE package.

AZCO Corp. has over 25 years experience developing solutions for a wide range of feeding and cutting applications. They offer cutting edge, field proven systems and components that are easily adapted to meet the needs of the most complex applications. AZCO Corp. will provide the most efficient and cost effective solution for you.
